

2023 Annual Benefits Report

2050 PARTNERS SUCCESSFULLY PURSUED GENERAL PUBLIC BENEFIT [CALIFORNIA CORPORATIONS CODE SECTION 14630(A)(1)(B)]

2050 Partners was established in October 2015 as a majority women-owned California Benefits Corporation. Taken as a whole, 2050 Partners successfully provided a material, positive impact on society and the environment during 2023, its eighth year of operations. 2050 Partners recently completed the B Impact Assessment provided by B-Lab. We are pleased to report that our score this year is 134.3, slightly improved over our 2022 score of 134.0. The B Impact Assessment covers the impact of a business on five categories of stakeholders: governance, workers, community, environment, and customers.

With regard to Governance, 2050 Partners' score for 2023 was 16.3. 2050 Partners' vision statement confirms our dedication to providing environmental benefits:

Our company purpose is to shorten the path to carbon neutrality.

Our goal is to partner with leaders to reduce 2030 carbon emissions by 50 million tons.

With regard to Workers, 2050 Partners' score for 2023 was 30.2. During our eighth year of operations, 2050 Partners grew by three full-time employees to a total of 28 employees. We scored best on questions regarding financial security for our employees. We continue to offer benefits, including medical, dental and vision coverage, long- and short-term disability, and life insurance, for all full-time employees. In 2023, we added a monthly allowance for those who employees chose to waive medical benefits offered by the company. We fund a safe harbor 401K retirement savings plan for all employees. In addition, we offer unlimited Paid Time Off for all employees.

2050 Partners' score for Community is 16.0 in 2023. Factors in this category include job creation, diversity and inclusion, civic engagement and giving, local involvement, and suppliers and distributors. As a professional services company, we have fewer opportunities to use goods produced locally in our business, but we partner with local, like-minded professionals to provide the best services for our clients.

Our Environmental impact score remained 42.5 for 2023. As discussed further below, our core business of energy efficiency consulting positively impacts the environment, and our employees are personally committed to decarbonization.

Our score for the impact our services provide to our Customers for 2023 is 29.2. The B Impact Report recognizes that 2050 Partners' professional services "drive positive changes in organizations to improve their social and environmental impact."

2050 PARTNERS PURSUED SPECIFIC PUBLIC BENEFITS [CALIFORNIA CORPORATIONS CODE SECTION 14630(A)(1)(C)]

In 2023, we continued our significant relationships with large utilities in California, relationships from which all residents of California benefit. As a leader in environmental protection, the California legislature has adopted aggressive long-range goals to reduce greenhouse gases, increase energy efficiency, and construct new buildings using only zero net energy by the year 2030. 2050 Partners has taken a leading role in preparing the state to reach its 2030 goals. As manager for the one of our client's "Code Readiness" project, 2050 Partners is testing key technologies regarding performance and cost effectiveness to determine whether they are feasible alternatives for achieving 2030 decarbonization goals. For products that are determined to be viable for reaching goals, 2050 Partners will work with our utility clients to advocate the California legislature to adopt codes and standards that require their use. In an effort to ease adoption of these new technologies, 2050 Partners will also assist implementers in becoming familiar with them.

2050 Partners is also supporting the efforts of its utility clients in advocating for more efficient building codes and appliance standards set by the California Energy Commission and the federal Department of Energy. Key products and technologies that 2050 Partners addressed in 2023, with the assistance of its subcontractors, were residential and commercial air conditioners, residential and commercial water heaters, dedicated outdoor air systems, variable refrigerant flow units, non-residential hydronic heat pumps, motors, consumer electronic devices, battery storage devices, consumer appliances, and electric vehicles. In addition, 2050 Partners oversaw the development of several presentations focused on various aspects of improving energy efficiency and reducing greenhouse gas emission through improved codes and standards.

In 2023, 2050 Partners continued in its role as Energy Efficiency Manager for the Hawaii Public Utilities Commission (HPUC). In this job, 2050 Partners manages the program administrator for Hawaii's energy efficiency portfolio, oversees the program evaluator, and provides program and portfolio design guidance to the HPUC and the program administrator to help Hawaii meet its energy efficiency portfolio standards (EEPS) goal of 4,300 annual gigawatt-hour savings goal by 2030. This work materially supports Hawaii's goal of 100% renewable energy by 2045. As part of this work in 2023, 2050 Partners led the assessment of Hawaii's EEPS first performance period (2016 - 2020). 2050 Partners organizes and manages meetings of both the Hawai'i Energy Technical Advisory Group (TAG) and the EEPS Technical Working Group (TWG) which assist in evaluating progress towards the EEPS goal.

2050 Partners is a small consulting business headquartered in the home office of two of its principals, Ted and Whitney Pope. All of our employees work remotely from their home offices. We are personally and professionally committed to preserving the environment. To that end, we use recycled and recyclable products whenever possible, compost our waste when allowed, and consciously restrict our water use in the office and homes. The main office is equipped with 24 photovoltaic solar panels, a solar water heater, a heat pump water heater, and a dual-zone, two-stage high efficiency heat pump. We use phone and video conferencing services to avoid unnecessary travel to meetings and take public transportation when practical.

2050 Partners is also committed to giving back to our community. In 2023, we asked our employees to help us choose the recipients for our more substantial monetary donations. With the input from all employees, we donated to Rising Sun Energy Center (a leading green training, employment and residential efficiency organization serving low income residents in Northern California), Big City Mountaineers (instills critical life skills in under-resourced youth through transformative wilderness mentoring experiences), and Feeding America (partners with food banks, pantries and local programs to bring food to people facing hunger). We also provide support for the American Council for an Energy-Efficiency Economy (ACEEE), a nonprofit research organization, developing transformative policies to reduce energy waste and combat climate change.

2050 PARTNERS HAS NOT BEEN HINDERED BY SIGNIFICANT CIRCUMSTANCES IN CREATING ITS GENERAL AND SPECIFIC PUBLIC BENEFITS [CALIFORNIA CORPORATIONS CODE SECTION 14630(A)(1)(D)]

2050 Partners is proud of its success in achieving general and specific public benefits in 2023. As 2050 Partners continues to grow, we expect to take on more significant contracts with our clients which will lead to greater positive impact on the environment, thereby benefiting society at large.

2050 PARTNERS SELECTED B IMPACT ASSESSMENT AS ITS THIRD-PARTY STANDARD [CALIFORNIA CORPORATIONS CODE SECTION 14630(A)(1)(A)]

2050 Partners chose the B Impact Assessment because it provides an objective, comprehensive rating of a company's current impact. The B Impact Assessment is also easy to use, adaptable to a small start-up company, educational and transparent.

The B Impact Assessment meets California requirements for a third-party standard as set forth in California Corporations Code section 14601(g). The B Impact Assessment provides a comprehensive assessment of the impact of 2050 Partners and its operations on interested stakeholders, including its employees, suppliers, community, and the environment. The Assessment also captures best practices regarding mission, measurement, and governance. The last, heavily-weighted section of the Assessment identifies a company's specific "Impact Business Models," which includes the targeted, formal focus on benefiting a particular stakeholder through products and services or internal practices.

The B Impact Assessment is overseen by B-Lab's Standards Advisory Council, an independent committee of 18-22 industry leaders from sustainable enterprise, impact investing, government and academia. The B Impact Assessment standard by B-Lab follows international best practices and guidelines for standards development. A new version of the assessment is developed every two years. Prior to release of each new assessment, B-Lab puts the draft standard through a private beta period as well as a 30-day public comments period to ensure public input on the proposed standards.

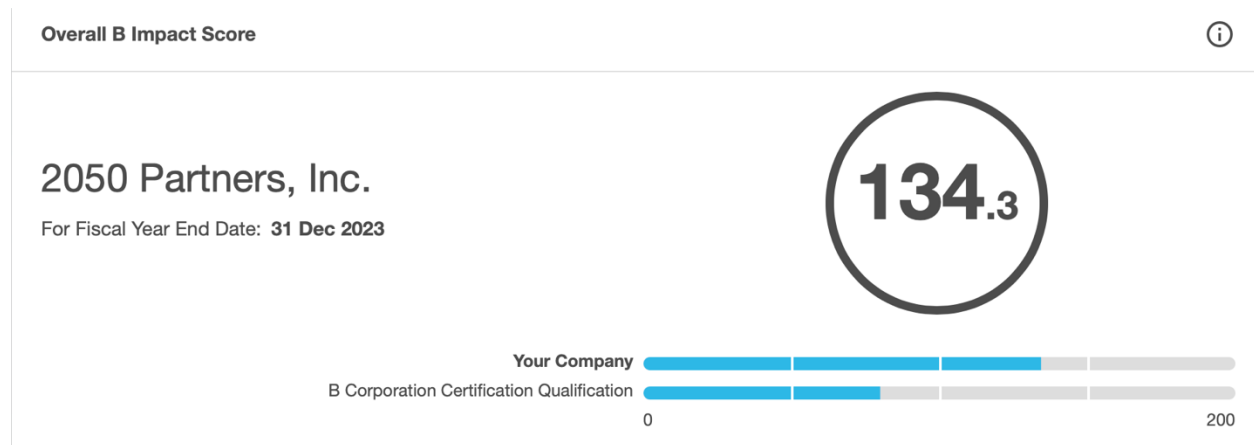

In choosing a third-party standard, 2050 Partners ruled out those that seemed to focus on industries not relevant to the work performed by 2050 Partners. For example, Food Alliance Certified, Agriplace, and Sustainable Farm Certification provide standards for sustainability for food and agriculture. Good Guide

Company Ratings, Green America, Green America Business Network, and Green Seal Business Certification provide standards for companies that produce tangible consumer products.

2050 Partners also considered cost in choosing B Impact Assessment as it’s third-party standard. The B Impact Assessment is a free, public service provided by B-Lab, a non-profit organization. Many of the companies that provide benefits assessments charge fees or require an organization membership to obtain an assessment.

ASSESSMENT OF OVERALL SOCIAL AND ENVIRONMENTAL PERFORMANCE AGAINST THE THIRD-PARTY STANDARD [CALIFORNIA CORPORATIONS CODE SECTION 14630(A)(2)]

As discussed above, 2050 Partners earned an Overall B Impact Score of 134.3 on its B Impact Assessment.

For reference, the B Impact Assessment website states that, “any score higher than 0 points is a good score, as a positive score indicates that the company is doing something positive for society and the environment. The Assessment rewards practices that go beyond standard business practice; therefore, every point earned on the Assessment reflects incremental, positive impact. Most companies score between 40 and 100 points out of the 200 points available.”¹ Based on the B Impact Assessment website (see Figure 1), our score of 134 puts us in the “outstanding” cohort of companies.

MAJORITY SHAREHOLDERS [CALIFORNIA CORPORATIONS CODE SECTION 14630(A)(3)]

Current shareholders are Whitney Pope (55%), Edward (Ted) Pope (10%) and Alex Chase (35%).

Ted Pope served as President and Chief Finance Officer of 2050 Partners in 2023. Alex Chase served as Vice President Consulting Services. Whitney Pope served as Secretary. No shareholder receives additional compensation for their duties as Officers and Directors of the company.

NO CONFLICT BETWEEN B-LAB AND 2050 PARTNERS [CALIFORNIA CORPORATIONS CODE SECTION 14630(A)(5)]

No conflict between B-Lab and 2050 Partners is known to exist.

CALIFORNIA CORPORATIONS CODE SECTION 14621 STATEMENT [CALIFORNIA CORPORATIONS CODE SECTION 146309(A)(4)]

It is the opinion of the Board of Directors for 2050 Partners that the company succeeded in pursuing its general public benefit purpose during 2023.
